Week 8 Report

November 11 - November 18

Team MembersEthan — *Design*Bailey — *Design and development*Jacob — *Design*Brady — *Organization and design*Matthew — *Organization and design***Summary of Progress this Report**

We've begun work on the web app, making decisions regarding database functionality on the control server.

We've also set up a Git repository for the backend code.

Pending Issues

We haven't fully configured our database organization scheme yet, and don't yet have our server set up to host the backend logic on.

Plans for Upcoming Reporting Period

We will be working piece by piece on the scoreboard logic over the next week and hopefully hear about obtaining a server soon.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Ethan	Provided input on database organization schemes for backend development	2	
Bailey	Began work on backend code in .NET Core	5	
Jacob	Provided input on database organization schemes for backend development	2	
Brady	Provided input on database organization schemes for backend development, as well as arranging meeting	2	
Matthew	Provided input on database organization schemes for backend development, as well as organized meetings with the team and client		

Gitlab Activity Summary

Nothing to report.
