Week 9 Report

November 28 - December 2

**Team Members**Brady — *Backend and Software Developer*Matthew Daoud — *Project Manager*Bailey Heinen — *Web App Developer*Ethan Swan — *Web App Developer*Jacob Boicken — *Linux Admin and System Developer***Summary of Progress this Report**

This week we focused on finishing the final design document. Our group worked together for a relatively long period of time during this point making sure its complete. Along with this we made some more progress on our web application and with that we decided to have a meeting with our client. In the meeting we asked some questions about the web app and got a borderline perfect response so that we know exactly what we are doing moving forward. Besides this we had some team meetings as well to prepare for our presentation next week. We are currently in the progress of finalizing our presentation and preparing so that we are good to go for tuesday.

**Pending Issues**

Finishing up the presentation and running through it to fully prepare. Along with this we will continue to work on the web application as well as begin work on the backend.

**Plans for Upcoming Reporting Period**

For the next period we plan to put all of our energy into making our faculty panel presentation the best as possible, and along with this we are continuing to work on the web application.

**Individual Contributions**

Team Member	Contribution	Weekly Hours	Total Hours
Brady	I did a lot of the building and creation of the final design document. Along with this I have also created and started implementing the presentation. Showed up to all meetings.	15
